#### Ques #: 0 - ID #: 6111 - Subject: Aids 2006

**Question:** It is believed that AIDS was originally a disease among monkeys in Central Africa.

1: True
2: False

#### Ques #: 1 - ID #: 6112 - Subject: Aids 2006

**Question:** AIDS has been rampant in the U.S. for over 100 years.

1: True
2: False

#### Ques #: 2 - ID #: 6113 - Subject: Aids 2006

**Question:** AIDS was initially believed to be a disease that primarily affected homosexual men.

1: True
2: False

#### Ques #: 3 - ID #: 6114 - Subject: Aids 2006

**Question:** AIDS is caused by the human immunodeficiency virus.

1: True
2: False

#### Ques #: 4 - ID #: 6115 - Subject: Aids 2006

**Question:** The HIV virus attaches to red cells causing debilitating anemia.

1: True
2: False

#### Ques #: 5 - ID #: 6116 - Subject: Aids 2006

**Question:** HIV is the virus that attacks T-cells and causes the immune system to decline in function.

1: True
2: False

#### Ques #: 6 - ID #: 6117 - Subject: Aids 2006

**Question:** HIV is easily transmitted through casual contact.

1: True
2: False

#### Ques #: 7 - ID #: 6118 - Subject: Aids 2006

**Question:** The most common methods of transmission of HIV are:

1: Unprotected sex
2: Contact with HIV contaminated blood or blood products
3: Perinatal transmission from mother to infant
4: All of the above*
Ques #: 8 - ID #: 6119 - Subject: AIDS 2006
Question: Perinatal transmission of HIV is also referred to as
   1: Vaginal transmission
   2: Inadvertent transmission
   3: Vertical transmission
   4: All of the above

Ques #: 9 - ID #: 6120 - Subject: AIDS 2006
Question: The only absolute method of preventing sexual transmission of AIDS is
   1: Latex condoms
   2: Abstinence
   3: Contraceptive foam
   4: All of the above

Ques #: 10 - ID #: 6121 - Subject: AIDS 2006
Question: Current screening tests for HIV in blood products are so sophisticated they can detect the presence of HIV antibodies in blood within hours of exposure.
   1: True
   2: False

Ques #: 11 - ID #: 6122 - Subject: AIDS 2006
Question: Risk of transmission of HIV increases with
   1: Deep injury contact with contaminated equipment
   2: Visible blood on a device
   3: A device in an artery/vein
   4: All of the above

Ques #: 12 - ID #: 6123 - Subject: AIDS 2006
Question: Florida ranks last in the nation in the number of adults and children with AIDS.
   1: True
   2: False

Ques #: 13 - ID #: 6124 - Subject: AIDS 2006
Question: HIV/AIDS is a chronic illness.
   1: True
   2: False

Ques #: 14 - ID #: 6125 - Subject: AIDS 2006
Question: The initial phase of HIV infection is characterized by extreme, debilitating nausea and vomiting.
   1: True
   2: False

Ques #: 15 - ID #: 6126 - Subject: AIDS 2006
Question: The average length of the asymptomatic phase of HIV infection is 2-3 weeks.
   1: True
   2: False

Ques #: 16 - ID #: 6127 - Subject: AIDS 2006
Question: Signs and symptoms of early HIV infection that may cause an individual to seek medical care include
   1: Fatigue, weight loss, and diarrhea
   2: Headache and arthralgia
   3: Urinary retention
   4: All of the above
Ques #: 17 - ID #: 6128 - Subject: Aids 2006
Random
Question: An opportunistic infection found in nearly 80% of all AIDS patients at some time during the course of illness which is a major cause of death is
   1: Salmonella
   2: Herpes simplex
   3: Pneumocystis carinii pneumonia
   4: Human papilloma virus (HPV)

Ques #: 18 - ID #: 6129 - Subject: Aids 2006
Random
Question: A CD4 count of 200 or less is consistent with a diagnosis of AIDS.
   1: True
   2: False

Ques #: 19 - ID #: 6130 - Subject: Aids 2006
Random
Question: It is best to give an AIDS patient only one retroviral medication at a time to prevent resistance.
   1: True
   2: False

Ques #: 20 - ID #: 6131 - Subject: Aids 2006
Random
Question: Universal precautions include
   1: Use of PPE
   2: Hand hygiene
   3: Proper disposal of contaminated waste
   4: All of the above

Ques #: 21 - ID #: 6132 - Subject: Aids 2006
Random
Question: The risk of acquiring HIV after an exposure is greater than the risk of acquiring Hepatitis B.
   1: True
   2: False

Ques #: 22 - ID #: 6133 - Subject: Aids 2006
Random
Question: Florida law requires consent for HIV testing.
   1: True
   2: False

Ques #: 23 - ID #: 6134 - Subject: Aids 2006
Random
Question: It is predicted that AIDS will become the number one cause of death in the United States for individuals between the ages of 25 and 44.
   1: True
   2: False

Ques #: 24 - ID #: 6135 - Subject: Aids 2006
Random
Question: If exposed to HIV/AIDS through occupational exposure, the employee will definitely be infected with HIV/AIDS
   1: True
   2: False

Ques #: 25 - ID #: 6136 - Subject: Aids 2006
Random
Question: Current preventive methods such as the use of condoms is causing the number of cases of HIV/AIDS among men having sex with men to decrease.
   1: True
   2: False
Ques #: 26 - ID #: 6137 - Subject: Aids 2006
Question: The mode of transmission that accounted for 80% of all AIDS cases in 2004 was
1: Vertical transmission
2: Occupational exposure
3: Blood transfusion
4: Unprotected sex

Ques #: 27 - ID #: 6138 - Subject: Aids 2006
Question: The number of people living with HIV/AIDS is increasing.
1: True
2: False

Ques #: 28 - ID #: 6139 - Subject: Aids 2006
Question: HIV/AIDS affects significantly more blacks than whites.
1: True
2: False

Ques #: 29 - ID #: 8505 - Subject: AIDS 2006
Question: CMV retinitis can cause blindness.
1: True
2: False

Ques #: 30 - ID #: 8506 - Subject: AIDS 2006
Question: Kaposi's Sarcoma can affect the GI tract, lower extremities, skin, lungs and lymph system.
1: True
2: False

Ques #: 31 - ID #: 8507 - Subject: AIDS 2006
Question: ELISA and Western Blot are 2 lab tests used for diagnosis of HIV.
1: True
2: False

Ques #: 32 - ID #: 8508 - Subject: AIDS 2006
Question: Western Blot is the first lab test to be done.
1: True
2: False

Ques #: 33 - ID #: 8509 - Subject: AIDS 2006
Question: As the AIDS virus progresses, the CD4 count will rise indicating imminent immune system failure.
1: True
2: False

Ques #: 34 - ID #: 8510 - Subject: AIDS 2006
Question: Viral load measures the amount of virus detected in the blood.
1: True
2: False

Ques #: 35 - ID #: 8511 - Subject: AIDS 2006
Question: Treatment of HIV disease involves more than medication. It also involves physical care, emotional support and counseling.
1: True
2: False
Ques #: 36 - ID #: 8512 - Subject: AIDS 2006

Question: Most drugs to treat HIV infections have side effects which include

1: GI complaints
2: Headache
3: Peripheral neuropathy
4: All of the above

Ques #: 37 - ID #: 8513 - Subject: AIDS 2006

Question: The discovery of the vaccine to prevent the transmission of HIV is imminent.

1: True
2: False

Ques #: 38 - ID #: 8514 - Subject: AIDS 2006

Question: After exposure, healthcare workers will be tested for HIV initially and then periodically throughout the next 6 months.

1: True
2: False

Ques #: 39 - ID #: 10063 - Subject: AIDS 2006

Question: Shaking hands is considered “full contact” and absolutely puts you at risk for contacting HIV.

1: True
2: False

Ques #: 40 - ID #: 8515 - Subject: AIDS 2006

Question: If you receive exposure to blood/blood products through a cut, you should

1: Wash hands vigorously with soap and water
2: Report incident to immediate supervisor
3: Go to the ER
4: All of the above

Ques #: 41 - ID #: 10037 - Subject: AIDS 2006

Question: Saliva is not one of the 4 bodily fluids that can transmit the HIV Virus.

1: True
2: False

Ques #: 42 - ID #: 10036 - Subject: AIDS 2006

Question: Shaking hands is the most common way to transmit HIV?

1: True
2: False

Ques #: 43 - ID #: 10038 - Subject: AIDS 2006

Question: HIV can be transmitted by mosquito bite.

1: True
2: False

Ques #: 44 - ID #: 10040 - Subject: AIDS 2006

Question: Having HIV means you also have AIDS.

1: True
2: False

Ques #: 45 - ID #: 10064 - Subject: AIDS 2006

Question: If you share chewing gum with someone who has HIV you can contract the disease.

1: True
2: False
Ques #: 46 - ID #: 10041 - Subject: AIDS 2006
Question: You can have a baby if you are HIV positive. Your baby will not contract HIV.
1: True
2: False

Ques #: 47 - ID #: 10042 - Subject: AIDS 2006
Question: There is no risk of transmitting HIV thru a human bite if the skin is not broken.
1: True
2: False

Ques #: 48 - ID #: 10039 - Subject: AIDS 2006
Question: HIV is an airbourn disease and can be transmitted by coughing and sneezing.
1: True
2: False

Ques #: 49 - ID #: 10035 - Subject: AIDS 2006
Question: You should still use protection if both partners have HIV
1: True
2: False
